Bar None

INDUSTRIAL LOTION HAND & BODY SOAP

DESCRIPTION

This soap-like product is a better cleaner and kinder to the skin than soap. Instead of being made from oils and caustics, as soaps have been for thousands of years, Bar None is made from modern synthetic surfactants derived from pure coconut oil. All of the natural glycerin of the coconut oil is retained and lotionizers are added for maximum kindness to the skin. Softness to the skin and better cleaning are noticeable after every use, but especially against greasy industrial soil and especially in hard water areas.

USES

For washing one's hands, hair and the complete body to remove dirt, grime, greasy, oily soil.

HOW TO USE

Wet the hands, the hair or skin with water. Then add a few drops of Bar None. Rub to a rich lather to clean. Rinse off soil and "soap" with water.

BENEFITS

SOAPLESS SOAP: Has similar appearance to liquid soap, can be used through standard soap dispensers, etc., but Bar None has none of the negatives of soap.

HARD WATER TOLERANT: There's no curdling or loss of cleaning ability when used with hard water.

BETTER AGAINST GREASY SOIL: The synthetic detergent base outcleans soap against greasy, oily soil.

MORE NEUTRAL pH: Caustics used in making soap result in a higher pH than required in Bar None.

ATTRACTIVE FRAGRANCE: Bar None will never develop that sour smell that some soaps do with age.

SPECIFICATIONS

APPEARANCE.....Pearly orange/pink
NON-AQUEOUS.....14% ± 0.5
ODOR.....Cherry/almond
SPECIFIC GRAVITY.....1.030 ± 0.005
DENSITY.....8.60 ± 0.05 lb/gal
BOILING POINT.....Near 212°F
pH.....9.0 ± 0.5
FLASH POINT.....None to boiling
STABILITY.....One year minimum
