for personal skin care

## ANTIBACTERIAL HAND & BATH SOAP

CREAMEDIC® ANTIMICROBIAL HAND & BATH SOAP IS MORE THAN JUST THE HIGHEST QUALITY SOAP. AS THE NAME INDICATES IT KILLS A BROAD RANGE OF PATHOGENIC MICROORGANISMS AS IT CLEANS. IT CONTAINS PCMX, FOR 50 YEARS THE CHOICE OF GERM KILLER IN COSMETIC GRADE PRODUCTS. THIS CREAMEDIC BRAND IS MADE FROM RICH LATHERING, DEEP CLEANING COCONUT OIL WITH ALL ITS NATURAL GLYCERIN RETAINED AND LANOLIN ADDED TO FURTHER SOFTEN THE SKIN...AN ATTRACTIVE FRAGRANCE MAKES IT APPEALING TO BOTH MEN AND WOMEN.

### IMPORTANCE OF HAND WASHING

Experts generally agree that the single most effective practice to prevent the spread of germs is good hand washing. A study of 305 Detroit school children, for instance, found that youngsters that washed their hands four times a day had 24% fewer sick days due to respiratory disease and 51% fewer days lost because of stomach upset.

### EPIDEMIOLOGY CONCERNS

One's skin houses what epidemiologists term "transient" and "resistant" microorganisms. Transient microbes represent recently arrived contaminants on the surface of the skin that may be removed by hand washing with plain soap or detergents. Most resident microorganisms are found deeper in the layers of the skin and are best killed or inhibited by washing with a product such as Creamedic Antimicrobial soap containing a proven germicide.

### PROPER HAND WASHING

1. Wet hands and apply soap. 2. Rub hands together vigorously to develop lather. Cover and scrub all surfaces including under finger nails. 3. Continue as above for 10-15 seconds. 4. Rinse hands under running water. Leave water running while drying hands. 5. Dry hands with a clean, single use towel. Avoid touching fixtures with clean hands. 6. Cover hand with towel to turn off faucet. Dispose of towel.

### BENEFITS

- **PREMIER QUALITY:** In every respect this is the finest quality liquid hand & bath soap available, whether chosen for its antimicrobial effectiveness, its cleaning or just because it is so nice to use.
- **ANTIMICROBIAL:** Contains Parachloro-metaxylenol to kill bacteria and other microorganisms on the skin.
- **RICH LATHER:** Made with natural coconut oil, still recognized as producing the most copious, most stable suds of all soap ingredients.
- **IT'S LOTIONIZED:** Coconut oil contains glycerine that is often extracted and sold separately. The glycerine is left intact in Creamedic soaps for their skin softening ability and lanolin is added for further emolliency.
- **HIGHER SOLIDS:** Liquid hand soaps typically are 12 to 15% solids. This premier Creamedic brand is 22% solids. Less Creamedic Antimicrobial lathers and cleans better and it can even be diluted with water if desired.
- **PLEASANT FRAGRANCE:** Made with cosmetic grade fragrance that appeals to both men and women but dissipates not to linger or overpower.

### SPECIFICATIONS

Basic Component .....coconut oil  
Antimicrobial Agent .....PCMX  
Lotionizing Components..glycerin & lanolin  
Non-Aqueous Total.....22% ± 0.5  
pH.....10.5 ± 0.5  
Color .....pearlized pink  
Fragrance.....floral  
Specific Gravity.....1.00 ± 0.05
