

Poten

POWER CLEANER & DEGREASER

DESCRIPTION

A high potency, low foam cleaner and degreaser that is especially effective against oily, greasy soil for industrial and institutional cleaning. As a concentrate it can be mixed with 30 to 40 parts water for general cleaning. In quarts, ready-to-use, it is many times more effective than super-market brands. It's not a soap, not an ordinary detergent, it is non-combustible, non-caustic, contains no abrasives, leaves no gritty residue and only requires rinsing on food contact surfaces.

USES

Removes oil, wax and soil from floors, walls, painted surfaces, vinyl, plastic and other surfaces. Cleans sinks, tubs, fans, appliances, grills, plant machinery and office equipment.

HOW TO USE

Dilute at 20:1 for wax removal and similar, really tough cleaning jobs. Mix 30 or 40:1 for general cleaning. At this dilution, this product is a highly effective cleaner and grease cutter. Dilute anywhere from 60 to 100:1 for light duty cleaning such as damp mopping, etc. Start at a high dilution of the product and use a more concentrated dilution as the cleaning need demands.

May be used full strength as an industrial strength spray & wipe cleaner. Rubber gloves are recommended where hands will become wet with cleaner.

BENEFITS

INDUSTRIAL STRENGTH: Made to do tough cleaning of greasy, oily, waxy soil.

FAST ACTING: Penetrates, loosens and suspends hard to remove soil and prevents its redeposition.

REPLACES PETROLEUM DISTILLATES: In many cases this non-flammable, water based cleaner will replace hazardous solvents – not just for housekeeping, but for production use as well.

SPECIFICATIONS

APPEARANCEBlue-green liquid
ODORSassafras
SPECIFIC GRAVITY1.030 ± 0.005
DENSITY8.60 ± 0.05 lb/gal
BOILING POINTNear 212°F
pH12.5 ±0.5
FLASH POINTNone to boiling
STABILITYOne year minimum
